DETAILED ACTION

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Information Disclosure Statement

The Information Disclosure Statement submitted on November 30, 2005 has not been considered.

Drawings

The drawings were received on March 16, 2005. These drawings are acceptable.

Claim Rejections - 35 USC § 102

Claim 22 are rejected under 35 U.S.C. 102(b) as being anticipate by Moretti et al., 5,374,088.

Regarding claim 22, Moretti et al. disclose, in Figures 1, 2, and 4, a connecting member comprising a housing 5 and a locking member 2. The housing 5 has a first

Art Unit: 3679

end, a second end, and an opening 12. A pair of retaining rims **A1,A2** extend from the housing 5. The locking member 2 has a tab 13 and a button 15. The opening is defined in the housing between the retaining members **A1, A2**. The locking member 2 extends between the retaining rims **A1,A2**. The locking member 2 has a major axis **A1** and a minor axis **A2**. The tab 13 is along the minor axis **A1** and the button 15 is along the major axis **A2**.

Allowable Subject Matter

Claims 24-26 are allowed.

Claim 23 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

regarding claim 23, the prior art of record does not disclose or suggest a connecting member further comprising a second locking member having a second button and a second tab normally biased through a third opening, and being in a housing. The closest prior art, Moretti et al., 5,374,088, only discloses one locking

Art Unit: 3679

member and there is no motivation, absent applicant's own disclosure, to modify Moretti et al. because a second locking member with a different configuration is not required;

regarding claim 24, the prior art of record does not disclose or suggest a connecting member comprising a second retaining rim having an inwardly depending second tab biased in a second opening of the housing (claim 24, line 8-9). The closest prior art, Coutts, 2,832,612, show a second retaining rim which are integral with the housing and do not have an inwardly tab; and,

regarding claims 25-26, these claims depend from claim 24.

Response to Arguments

Applicant's arguments filed on March 16, 2006 have been fully considered but they are not persuasive.

With respect to claim 22, Applicant argues that Moretti, 5,374,088, fails to disclose the locking member being "disposed about said housing". In response, the examiner has given the terms "disposed about" their broadest reasonable interpretation.

DPS Applicant should note that "disposed about" does not ^{just} ~~only~~ infer that the locking member [^] ~~has~~ ^{Since} has to be around the housing as argued by applicant ^{when} ~~where~~ the term "about" means "reasonably close to". Thus, the locking member in Moretti is disposed reasonably close to the housing.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
